

Verify the following and, if appropriate, specify the associated location in the lab:

1. Notice Boards with Emergency Call list and hazard warning labels are posted at lab entrances
2. UF Laboratory Safety Manual is kept in the lab
3. A Chemical Spill Kit is available in each lab housing liquid chemicals
4. Material Safety Data Sheets (MSDS) are available
5. A First-Aid Kit is readily accessible
6. Fire Extinguisher is available
7. A Safety Shower is readily accessible to lab personnel
8. A plumbed Eyewash unit is readily accessible to lab personnel
9. Fire Extinguisher is available
10. Access to circuit breaker panel is unobstructed
11. Compressed gas cylinders are adequately secured
12. Cylinders are capped or have regulators attached at all times
13. Storage tanks for projects are adequately labeled
14. PPE e.g., gloves, safety glasses/goggles, lab coats, etc. is available (stored clean and in good repair) and worn for the activities being conducted
15. Walkways and means of egress and safety equipment are clear of obstructions
16. Exits and emergency exits are clearly identified.
